

Unlock the Potential of your Vehicle Data

c.technology designs, develops and delivers connected mobility solutions that transform data into scalable services for OEMs, their partners and end-customers.

Key Benefits:

Real-Time Data Intelligence: Full integration of your ecosystem: OEM – Partner – Vehicle Owner, served from a single data source, driving engineering data, predictive maintenance and OTA services.

Enhanced Customer Experience: Drive brand loyalty and market differentiation by connecting your customers and partners through state-of-the-art white label mobile & web apps delivered on one platform.

Monetization: Tap into new revenue streams by providing monetizable add-on services, such as premium in-vehicle features, subscription-based services, and value-added mobile and web apps.

Cost Savings: Lowering the total cost of ownership by eliminating extensive in-house development of cloud infrastructure and connected services. Enabling zero time to market.

Join these industry leaders in relying on c.technology:

“Working with c.technology allows us to meet our position as world leader in electric mobility on water and to open up new business models by leveraging the cloud solution and software infrastructure for vehicle intelligence.”

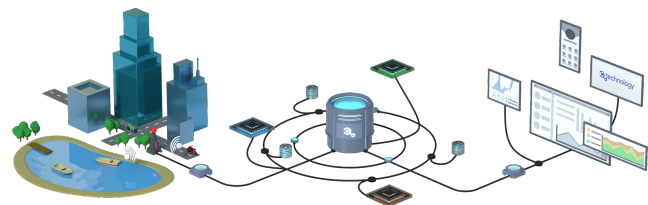

Thomas Wiedemann, Global Program Management Torqeedo

Core Features:

Cloud Services: Integrate with our cloud for data processing, storage and utilization.

API Integration: Leverage our APIs to create a platform tailored to your business objectives.

Software as a Service: Implementing backend & frontend solutions.

We don't just collect data - we make it work for you. Contact us to get access to a demo- account and discover how we can drive your success in the digital age.
