

80-100%

As part of a fast-growing tech startup based in Zurich, your main role will be in the front- and backend development of c.technology systems with the goal of creating a unique customer experience.

Responsibilities

- Frontend:
 - Implementation and further development of new features for the c.technology web platform (web apps) which serves the triangle of vehicle owners, vehicle professionals and OEMs
 - Implementation and further development of features for the c.technology end-to-end products (Android & iOS apps)
- Backend:
 - Conceptualization and development of new features, including their integration in existing systems, and thus helping to shape the future of the c.technology SaaS solution
 - Development of solution and architecture designs for the SaaS platform and their implementation
- Shaping the development of our solution stack, built using modern technologies such as Docker, Kubernetes, DevOps, GitOps, Microservices, web frameworks etc.
- Professional software development at the cutting edge
- Direct collaboration with the CTO

Qualifications

- Experience with Python / JavaScript, in particular Django / React (Native)
- Experience with relational database systems (SQL)
- Experience with Android / iOS release processes, continuous integration / delivery, as well as version control systems (git)
- Basic understanding of Linux and UNIX systems, the workings of Docker, and related container-based development
- Optimally, experience with time series, geo, and NoSQL databases, as well as prevalent cloud operators and offers (AWS, Azure, GCP)
- Strong desire and willingness to constantly learn and improve yourself and the team
- Good command of the German and English language
- A high degree of personal responsibility: as a young company, agility and innovation are at the core of everything we do
- Education: ETH / University / FH degree, Bachelor level or higher
- A passion for (electric) vehicles, mobility, IoT ("Internet of Things") and the start-up world

At c. technology, you can not only become part of an agile and innovative team, but also actively shape the journey of c.technology through your commitment. With our software-as-a-service solution, we serve (e-)powersport vehicle manufacturers (boats, motorcycles, e-bicycles, etc.) with cloud and vehicle services that are tailored to the needs of this industry. We focus on the triangle consisting of end customers, partners and manufacturers.

We offer you a cutting-edge, dynamic environment, a great team, fair conditions and a workplace that allows you to be within walking distance of the lake, the old town or the lively part of the city of Zurich. We also give you the opportunity to develop internally and continuously learn new things. Flexible working hours and locations, a good atmosphere and a high degree of personal responsibility are anchored in the DNA of c.technology AG.
